

Worldpay Tops the Charts in The Strawhecker Group's Analysis of Merchant Acquirers in Europe

September 17, 2024

Worldpay leads the field in total processing volume and number of transactions according to the report.

[Worldpay®](#), a global industry leader in payments technology and solutions, is the number one merchant acquirer in Europe according to new analysis from The Strawhecker Group (TSG). The inaugural directory from the analytics and consulting firm looked at more than 180 merchant acquiring firms and more than 3,700 data points in making its listings.

Worldpay was recognized as the number one acquirer in Europe for its processing of more transactions and more total value in dollars than its competitors. The report's findings were based on a mix of primary surveys from listed entities reviewed in combination with secondary research of publicly available materials.

"Being listed at the top of this new directory from TSG is a testament to Worldpay's global reach and ability to meet the needs of merchants wherever they're doing business," said Gabriel de Montessus, President of Global Enterprise at Worldpay. "Not only do we have the scale to deliver a seamless experience to merchants and consumers all over the world, but we also have the technology to help businesses optimize their payments and enhance their revenue while making it ever more convenient to complete transactions online and in store."

Earlier this year, TSG awarded Worldpay for [Best Performing Gateway](#) and Fastest Transactions as part of the firm's annual rankings.
